

Access control

Guiding the flow of people and cordoning off areas

Over 40 years of access control

Continuing an infinite success story

■ **For over 40 years**, turnstiles, customer guidance systems and barriers have been a focal point of the Wanzl product range. The innovative, high-quality Wanzl security products are in use in all kinds of critical locations requiring security against unauthorised access while granting unrestricted access to authorised persons.

■ **The Wanzl product range** contains a large number of motor-driven, electro-mechanical and mechanical security products for the control of entrances and exits in sporting and recreational facilities, office buildings and industrial complexes. In addition they have proven their worth in public facilities such as libraries, railway stations and airports. Wanzl has the optimum solution for individual requirements, including high pedestrian frequency, sophisticated design or special installation situations. Connection to security products and time recording systems, coin-operated and ticketing systems and other clearance signals is guaranteed with corresponding interfaces.

***The world is changing.
Take advantage of it!***

■ **Today, Wanzl employs** over 4,000 employees at eleven production sites worldwide, who work on new business fields, products and extraordinary product design with a consistently high quality and a vast production range. The result is a product that will extend Wanzl's success into the future: perfectly satisfied customers.

CLASSIC TURNSTILE

EGATE®

Quality_MADE BY WANZL.

Get more than a turnstile:
Benefit from Wanzl know-how

Competence in access control

■ **The range** of Wanzl turnstiles, entrance and exit systems and customer guidance systems is always expanding, but all the models have one thing in common – a name that guarantees quality: Wanzl.

Extensive production range

■ **Wanzl's production** relies mostly on in-house manufacturing. This enables us to always meet our own high expectations for product quality, short delivery times and excellent delivery readiness.

Competence in security products

■ **Wanzl ensures security** with particularly variable systems. Connection to security products and time recording systems, coin-operated and ticketing systems and other clearance signals is guaranteed with corresponding interfaces.

Wanzl guarantees

■ **In addition to the statutory warranty** we offer an extensive, reliable and flexible network of qualified service personnel. You can contact us on any day of the year on our service hotline.

ELEMENT

01.01 Portec

Distinctive round tube design

■ **Portec turnstiles for entrances and exits.** Reliable turnstiles with electro-mechanical design for safe and dependable individual entry separation for large flows of people.

Design

Solid steel or stainless steel casing with cast aluminium elements, stainless steel arms. Extremely compact, robust, low-maintenance mechanism. LED function display in direction of entrance and exit, acoustic alarm signal and operating panel as standard. Can be turned freely when the power is disconnected.

Functions

Automatically blocks when a group of X persons has passed. When individual persons leave the area, the same number of persons are granted access through the turnstile until the number X is reached once more (car park system).

Operating panel

With LCD display. Function selection: One-time and group release in both directions, pedestrian counting for one-time opening. Connection for card reader and serial interface.

Anti-panic feature

In the event of an emergency the hinged arm design opens for passage in both directions. The acoustic alarm indicates emergency operation.

Finish

High-gloss, chrome-plated metal or polished stainless steel tube casing and base plate covers. Cast aluminium elements with plastic powder coating.

Accessories

Counterpart, channelling elements, channelling elements with acrylic glass panels, mount for card reader.

01.02 Sirio

Elegant motor-driven turnstile

- > *Ideal in sophisticated architectural environments*
- > *In stream-line stainless steel housing*
- > *Available with 2 or 3 arms*

SIRIO WITH 2 ARMS

01.02 Sirio

Attractive design

■ **Sirio turnstiles ensure safe, dependable and convenient movement of people.** Reliable individual entry separation in a wide range of entrance areas. Release using card reader, coin operation, operating panel,

ticketing system or according to individual requirements. The elegant channelling elements are in-keeping with the attractive design of the Sirio turnstiles and aid reliable entry separation.

Standard equipment

Design: Stainless steel casing, side uprights and pivotal centre. Tried-and-tested, low-maintenance mechanism. Programmable control and can be adapted to suit individual customer requirements. Can be integrated into the building management system. Interface for security products and time recording systems.

System integration

Release using standard card reader, coin operation, ticket machine, control panel, ticketing system or building control system.

Operating panel

For any additional, manual releases, the display shows operation conditions, counter status, error messages and warnings. Connection of up to 2 turnstiles. Adjustment of control parameters.

Optional equipment

LED release signal lighting, crawl/climbing guard with acoustic alarm, sensors for non-contact rotation, emergency button.

Finish

Brushed stainless steel.

Accessories

Device for card reader or camera system, partitions as channelling elements (see page 44 onwards), natural stone cover available on request.

Sirio motor-driven		
	2-arm	3-arm
Finish Stainless steel	Order no. 23.50 004.09 V001	Order no. 23.50 003.09 V001
The turnstile can be turned freely when the power is disconnected.	The turnstile rotates either by 120° or 240° during a cycle, depending on its position. In addition, the turnstile can be motor-driven into an alarm position. Passage is then authorised.	Rotation is initiated by a motor, in each case by 120°. In the event of an alarm the turnstile can be rotated freely.

01.03 EasyGo

Motor-driven variable turnstile

- > *Space-saving solution for assembly on walls or uprights*
- > *Compact stainless steel casing*
- > *Available with 2 or 3 arms*

EASYGO WITH 2 ARMS

01.03 EasyGo

Classic design

■ **EasyGo turnstiles, compact design and variable uses.** Efficient in use for many years, for a wide variety of situations. For reliable individual entry separation with minimal space requirements. Release using card reader,

coin operation, operating panel, ticketing system or according to individual requirements, with co-ordinated channelling elements.

Design

Fully enclosed stainless steel casing and pivotal centre. Tried-and-tested, low-maintenance mechanism. Programmable control and can be adapted to suit individual customer requirements. Can be integrated into the building management system. Interface for security products and time recording systems. Can be turned freely when the power is disconnected.

System integration

Access can be combined with ESD technology.

Operating panel

For any additional, manual releases, the display shows operation conditions, counter status, error messages and warnings. Connection of up to two turnstiles. Adjustment of control parameters.

Optional equipment

LED release signal lighting, crawl/climbing guard with acoustic alarm, sensors for non-contact rotation, emergency button.

Finish

Brushed stainless steel.

Accessories

Partitions act as channelling elements and can be combined with transparent or printed glass (see page 44 onwards).

EASYGO WITH VENDING UNIT, 2-ARM

01.04 EasyGo with Vending Unit

Efficiently controlled access

■ **EasyGo turnstiles with Vending Unit** guarantee functional reliability and ensure reliable processes. Design with integrated ticket machines. Reliable access control for paid entry to conveniences in restaurants, rest stops,

petrol stations, museums, events and many other areas. Channelling elements from the Wanzl customer guidance range ensure reliable entry separation.

Design

Fully enclosed stainless steel casing. Vending Unit features: coin system with automatic sorting using a hopper, stores up to approx. 1,100 coins, coins accepted can be freely specified, integrated coin acceptor, receipt printer. EasyGo motor-driven turnstile.

Fast amortisation

Entry fees ensure quick amortisation (ROI). Receipt use is optional, e.g. can be redeemed as voucher.

System adjustment

Freely configurable fee system. Output of statistics and frequency measurements. Hopper filling level can be freely specified. Receipt printing.

Optional equipment

Accepts credit and debit cards and banknotes. Lockable, audit-proof hopper and cashbox. ETISS online till software.

Finish

Brushed stainless steel.

Accessories

Access gate for children. Optional swivel gates for personnel entrance/exit or transport of goods. Illuminated, customised unit (height 300 mm).

Entrance gate with authorisation verification

- > *Inviting, permanently open entrance system with visual indication of status*
- > *Reliable and short reaction time in the event of unauthorised access*
- > *Attractive combinations of materials and colours*

02.01 eGate® open system

Modern design with advanced lighting technology

■ **The eGate open system** enables the option of access via smartphone or other media. The operating status is displayed by channelling elements, illuminated with LEDs as standard.

Design

Fully enclosed aluminium uprights, stainless steel pivot mechanism, barrier elements made from acrylic glass/ toughened safety glass. Integrated PC interface for data exchange, WEAC control with remote maintenance.

Functions

The system is open and monitors entry/exit. If the access authorisation is valid, the system changes its status and enables passage. If the access authorisation is invalid, the system closes, changes its status to blocked and triggers an alarm.

System

Clearance signal using potential-free contact, e.g. card reader, day ticket, smartphone, transponder bracelet or remote control.

Optional

Access widths can be individually adapted to the building's architecture. Barrier-free access possible.

Finish

Plastic powder-coated aluminium uprights.

Accessories

Software package, remote control, operating panel.

02.02 eGate® control system

Efficiently controlled access

■ **eGate control system.** Entrance and exit system with innovative control system for access authorisation and visual and acoustic alarm management in the event of misuse. The seamless, efficient and simultaneously fast

check of the access authorisation is done on the integrated scanner – meeting the highest of safety requirements.

Design

Fully enclosed aluminium uprights, stainless steel pivot mechanism. Individually illuminated LED channelling elements. Toughened safety glass swivel arms. Integrated PC interface for data exchange. Programmable WEAC control with remote maintenance tool.

Functions

If the access authorisation is valid, the system releases passage for one person. The system remains closed if there is no valid access authorisation. If the personal profile does not match the programmed sensors, an alarm is triggered.

Scanner

With maximum scanner accuracy, e.g. for barcodes, QR codes, smartphones, transponders, etc.

Optional

Integration of software for automated data analysis via LAN. Flatscreen with easy-to-understand operating display.

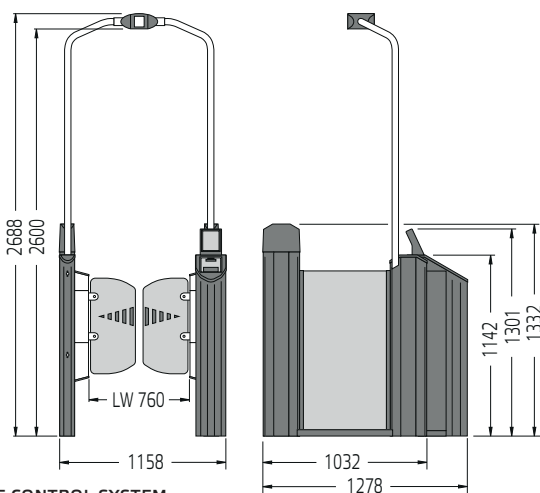

Finish

Plastic powder-coated aluminium uprights. Acrylic glass channelling elements with illumination. Polished stainless steel drive unit.

Accessories

Exit section, radio remote control, software package.

03.01 Atlas

For a high level of security and massive flow

■ **Atlas turnstiles.** Specifically tried and tested for entrances such as in works perimeter access systems, sporting and recreational facilities and open-air swimming pools.

Design

Turnstile with barriers or arms, 90° or 120°. Maintenance-free, electric motor drive. One-way and two-way operation possible. Easy assembly.

Function

Clearance signal in direction of entry and exit using potential-free contact (e.g. card reader, operating panel, button, etc.).

Technical specifications

Electricity supply 230 V~, 50-60 Hz. Power consumption max. 50 VA. Manufacturing standard ISO 9001. Operating temperature -25°C to 40°C. Can be turned freely when the power is disconnected. Integrated control unit.

Finish

Polished stainless steel barrier bars, channelling elements and uprights. Polished stainless steel, hot galvanised steel or powder coated bridge.

Accessories

Canopy on request with gutter and lighting. Device for card reader. Assembly kid for locking if no power.

■ **Additional payment Vending Unit** for indoor and open-air swimming arenas. Issue of entry, day or hour cards, etc.

Design

15" PC touch display with interactive menu navigation. Robust, polished stainless steel casing with integrated user-friendly payment functions. Software for professional management of all machine transactions and settings. Graphics-enabled ticket printer. Additional payment Vending Unit suitable for indoor and outdoor areas with sufficient canopy (accessory).

Standard equipment

Coin acceptance with automatic sorting. Banknote acceptor with integrated dispensing function. Integrated alarm system. Mechanical locking of the cash containers. Two hoppers, each for approx. 1,100 coins. Cashbox for approx. 2,200 coins. Anti-theft multi-point locking. Cash management software. Graphics-enabled ticket/tag printer. LAN interface for data exchange. Illuminated, customised unit (height 300 mm).

04.03 Technical data of Vending Units

Reliable technology, easy to use

Technical specifications	
Rated power supply	230 V ~, 50 Hz or 115 V ~, 60 Hz
Rated output	max. 400 W
Fusing required on mains side	6 A
Protection class	I (protective earthing) in accordance with EN 61140 (VDE 0140-1)
Degree of protection in accordance with EN 60529	IP X3
Ticket machine dimensions	Width: 725 mm Depth: 400 mm Height: 1,675 mm Height with light box (optional): 1,975 mm
Display element	15" PC touch display
Finish	Polished stainless steel casing
Empty weight (without coins)	Approx. 120 kg

Options

Self-locking, audit-proof cashbox. Credit/debit card terminal with PIN pad. One additional hopper. Customised layout. Hardware and software support hotline.

> *Made from stainless steel*

> *Curved and straight designs*

STAINLESS STEEL PARTITION
Toughened safety glass
Front: straight design
Rear: curved design

WALL FIXTURE
Clips, toughened safety glass, upright

Area of application

Entry/exit barrier assembly on fitted floors. Option of wall fixture. Combination with turnstiles and entrance and exit systems.

Accessories

Bollards to protect the system. Stainless steel tubing with diameter of 80 or 120 mm.

Standard equipment: Polished stainless steel tube uprights with base plate cover. Polished stainless steel fixing clips. Transparent or printed toughened safety glass on customer request. Toughened safety glass design with ground and polished edges.

Assembly

Assembly of uprights on fitted floors

05.02 Aluminium partitions

Elegant and secure

> *Attractive design*

05.03 Swivel gates

Controlled entry and exit

> Mechanical or electro-mechanical, one-sided or two-sided opening

> Flexible access widths

> Panic alarm as standard

SWIVEL GATE
opening to left

SWIVEL GATE
with two Sirio turnstiles

Area of application

Tried and tested for single entry/exit in conjunction with entry separation systems. Barrier-free passage. Adjustment of access width to structural conditions.

Functions

↑ = emergency exit direction

Standard equipment: Steel tube uprights with metal base plate and base plate cover. Steel tube swivel barrier. Soft door closer, adjustable closing speed. Plastic sign, printed on both sides.

Finish: Stainless steel, high-gloss chrome plating or coloured plastic powder coating*.

Operating panel

As standard for electro-mechanical swivel gates.

* Colours on request.

05.04 Goods transport gates

Gateway width up to 1,350 mm

> For forklifts or lift trucks with Euro pallets

> Designs with one or two leaves

> High or low design

GOODS TRANSPORT GATES
Double system

Area of application

Lockable gates for transporting goods. Variable gateway widths – extendable swivel barriers and assembly as a double system allow even Euro pallets to be transported through the gateway.

Function

Once the goods transport gate has been unlocked, the barrier can be swung in either direction and locks in the 90° position.

Standard equipment: Steel tube uprights with metal base plate and base plate cover. Swivel barrier in various steel tube designs and sign printed on both sides.

Finish: Stainless steel, high-gloss chrome plating or coloured plastic powder coating*.

Accessories

Angle adapters on goods transport gate make use of the full gateway width.

* Colours on request.

05.05 Uprights/connection tubes

Proven system for a wide range of applications

■ **Uprights and connection tubes.** Innovative system to direct the flow of people and delimit areas.

Design

Stainless steel tube uprights with diameter of 50 mm and large base plates. Stainless steel base plate cover. Connection sleeves for division with one, two or three tubes. Steel connection tubes with diameter of 40 mm. **Finish:** Polished stainless steel.

Optional

Coloured connection sleeves in nine colours and chrome plating.

Assembly

Assembly of uprights on fitted floors.

Optional

For movable barriers – floor socket for removable uprights without base plates. Internal diameter 50 mm, insertion depth 145 mm.

Assembly with lower concrete layer

Assembly of uprights on fitted floors with spacers and screws of a suitable length.

Optional

High partition model with vertical bars.

COAT LOCKERS
Basic unit with three extension units

4-part locker system

One basic unit and one extension unit, each with four locker compartments with numbered coin deposit locks

06.01 Lockers/coat lockers

Valuables always well looked after

■ **Lockers and coat lockers.** Visitors can happily leave any bags, holdalls, equipment, etc. safely in the lockers and can visit the site without having to carry the extra load. In addition, thefts from bags are hampered effectively. Employees can use coat lockers to store their own clothes

if they wear special clothing or uniforms when working. Providing lockers brings order to social spaces.

Standard equipment: Steel tube structure consisting of semi-circular profiles with height-adjustable feet. Clothes compartment with height-adjustable coat rail. Sheet metal bottom, wire-grate front and side sections.

Finish: Plastic powder coating in anthracite grey RAL 7016 and white aluminium RAL 9076.

Lock system

Each locker can be locked separately. Assembly of different lock systems is possible.

3-part locker system

One basic unit and one extension unit, each with two lockers for bags and one locker for clothing or luggage, with numbered coin deposit locks. Coat rails available as accessories.

2-part locker system

One basic unit and one extension unit, each with two locker compartments for clothing or luggage, with numbered coin deposit locks. Coat rails available as accessories.

Coat locker system

One basic unit and one extension unit, each with one valuables safe with cylinder lock and one coat locker with cylinder lock, sign holder and coat rail.

TECHNICAL PROJECT PLANNING
on site

Ideas for format

We make your construction project a reality using a multitude of products and many years of experience, with professional project services from initial contact, right through to assembly on site.

State-of-the-art 3D planning

Realisation of extensive project requirements is illustrated using 3D modelling. The plans will be discussed and finely tuned in detail, taking the structural conditions into account.

08.02 Service

Assembly - Maintenance - Repairs

> *To preserve the value of your investments*

> *For flawless operation*

> *Reliability and guaranteed service*

FLEXIBLE ASSEMBLY
with commissioning

Outstanding care for outstanding technology

An experienced team of specialists provides you with short reaction times, a professional after sales service and simple handling of any service requirements. Tell us what we can do for you and we will be happy to help.

Maintenance

To maintain the Wanzl quality we recommend regular maintenance of all components. Ongoing maintenance ensures that the value of your investment is preserved. Ask for your own personalised maintenance plan.
