Thanks to the tempering process, opal glass offers superior thermal and mechanical resistance to any other material. In addition, it is a very hygienic material due to its low porosity, making it very suitable for the hospitality industry.

This distinction guarantees a product designed and manufactured for professional use. The dual purpose of this range of items is to increase business profits and facilitate the work of hospitality professionals.

ALAR

SILICA

▾ WHITENESS

To achieve a porcelain with a shinier white, the best raw materials have been combined and subjected to a firing of more than 1250°C, which helps to increase its shine and resistance.

▾ RESISTANCE

ALAR porcelain has DURABLE PORCELAIN technology, thus offering great resistance to the usual shocks during its use in a professional kitchen and living room, as well as to chemical aggressions due to its maintenance and contact with food products.

The enamel is exceptionally resistant to scratches and marks caused by cutlery, which gives it a longer life of use.

▾ COLOUR

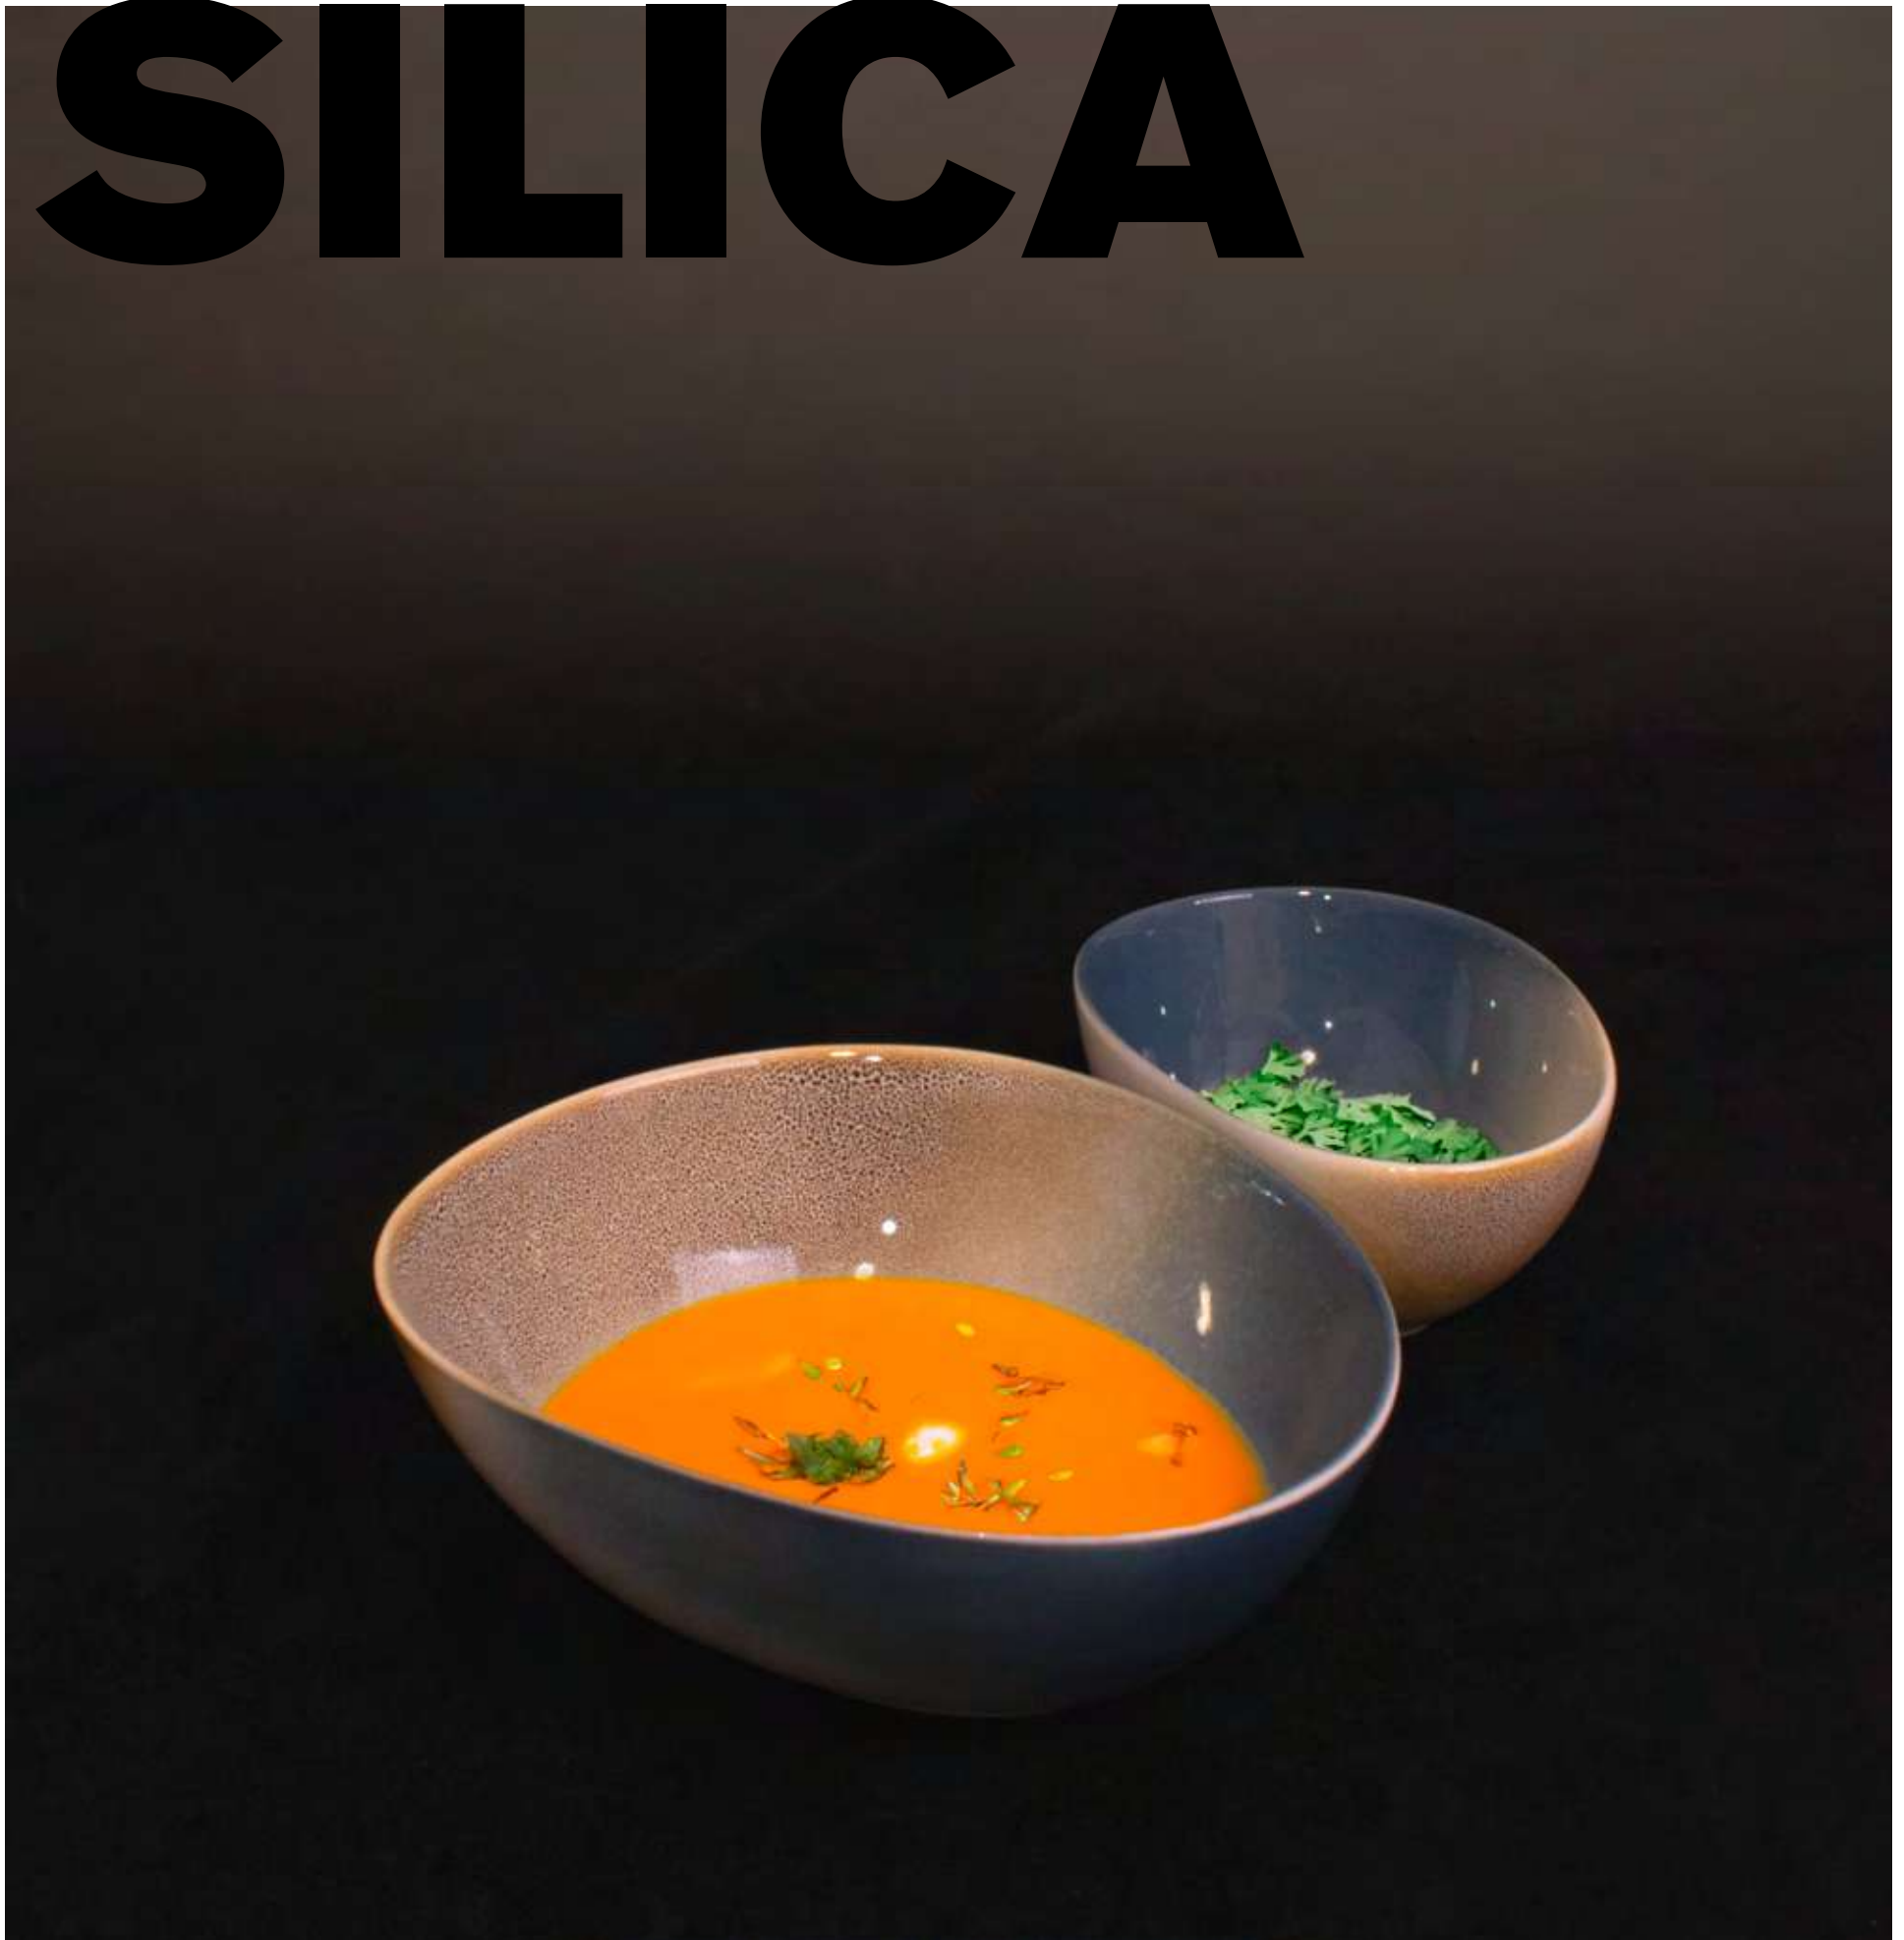

The silica color line offers you a wide range of designs and textures that will give a special touch to your table and presentations.

▾ DESIGN

With unique and avant-garde shapes, ALAR SILICA has designs that adapt to any style of catering, which will add a great personality to your gastronomic creations.

Dare to combine the ALAR SILICA collections to your heart's content and create true culinary works of art.

Alar SILICA is a lightweight PORCELAIN intensified with alumina and fired at 1250 °C to optimize its resistance to physical shock. Its wide variety of shapes and designs make it the perfect collection for restaurants looking to differentiate themselves with special tableware within a consistent price range.
