T

Due to the tempering process, Opalglass presents a shock and thermal resistance higher than any other material. Furthermore, opalglass is a non-porous highly hygienic material, perfect for the horeca bussines.

Gracias al proceso de templado, el vidrio opal ofrece una resistencia térmica y mecánica superior a cualquier otro material. Además, se trata de un material muy higiénico debido a su baja porosidad, por lo que resulta muy adecuado para la hostelería.

L'Opal è un nuovo materiale che dà piatti e ciotole leggerezza e resistenza del vetro temperato. Grazie ad un trattamento speciale per il vetro, si realizzano prodotti con elevata resistenza meccanica termica ineguagliabile altro materiale, diventando fino a 5 volte più durevoli rispetto allo stesso prodotto in vetro convenzionale.

T

This label is a guarantee for a product designed and manufactured for its professional use. The goals of this range of items are to increase the profit of the businesses and to facilitate the labour of the horeca professionals.

Este distintivo garantiza un producto diseñado y fabricado para uso profesional. El doble objetivo de esta gama de artículos consiste en incrementar el beneficio de los negocios y facilitar el trabajo de los profesionales de la hostelería.

Questa approvazione è un prodotto progettato per l'uso professionale e migliorati: più lavaggi con lo stesso aspetto, maggiore resistenza all'abrasione e allo strappo in un minor numero di sostituzioni e mbuasgingeiossre. beneficio per il vostro

T

The tempering process through cold air streams builds up glass chorros de aire frío fortalece la estructura, ufarab mbmprioolcpleaoeczucuiacolalnioare rn vadset tlcir rouva cidractourcintoe y rleisatnicda sp ersop- eciales. El vidrio templado es 10 times more durable than standard glass.

El proceso de templado mediante el vsterturcot, ufarab mbmprioolcpleaoeczucuiacolalnioare rn vadset tlcir rouva cidractourcintoe y rleisatnicda sp ersop- eciales. El vidrio templado es 10 veces más duradero que el vidrio convencional.

Grazie ad un particolare trattamento termica ineguagliabile altro materiale, diventando fino a 5 volte più durevoli rispetto allo stesso prodotto in vetro convenzionale.

**STRECHED
FOOT**

Through this technique we achieve the ideal proportion between elegance and resistance, as well as the unique touch of one-piece glassware

**LASER
CUT**

With this technique we get a perfect refraction of light, which enhances the visual appeal and the tasting experience.

**IMPROVED
DESIGN**

Thanks to its unique design, the glass directs the aromas of the wine towards the nose, enhancing the olfactory experience.

**OPTIMIZED
THICKNESS**

In the blown process, the thickness of glass is distributed homogeneously, ensuring optimal resistance and a special sonority that seduces the expert hearing senses.

Venus

Venus glasses have been **specialy treated** in order to further improve their behavior and usability.

The thickness of the edge has been reduced to make it more pleasant in the mouth without losing resistance.

The foot is reinforced to increase the life of the cup.
