

## SMART SOCIAL DISTANCE AWARENESS REMINDER

### SAFEALERT™ SAL-9010 SOCIAL DISTANCE REMINDER

The New Normal Product Has Arrived

# SMART SOCIAL DISTANCE AWARENESS REMINDER

## INTRODUCTION

SafeAlert™ Model SAL-9010 Smart Social Distance Awareness Reminder device is a convenience way for your staff and customers to maintain healthy distancing. Staying for a healthy distance apart simply does not come naturally. It helps staff and customers remain a safe and healthy distance in public spaces. It scans the vicinity to detect if anyone is within the social distance allowed. A red alert warns staff and customers when they are too close.

**It is suitable for hotel reception, hotel concierge, bank counters, public service counters, cafes, hospital reception counters, supermarket cashier, offices, restaurants, shops, etc. to operate safely and comply with social distancing guidelines.**

## HIGHLIGHTS

1. SafeAlert™ Model SAL-9010 Smart Social Distance Awareness Reminder uses a new generation of time-of-flight (tof) laser ranging technology where a light transmitter emits light pulses. After encountering an object, the light will reflect, and the light capture by the lens is the flights. Time, the distance between the object and the lens can be judged by calculating the phase difference between the light emission and the reflection time. It can be treated as a ranging radar to detect where there is a person within a certain distance. The device uses dual distance measuring probes to increase the scanning angle of the scanning distance measurement. Customers entering from multiple different directions can be detected in real time, and the distance between customer and staff can be displayed on the device. This is the unique feature of the device where the scanning angle is 45 degrees compare to other market products, where the scanning angle is less than 25 degrees.
2. The red-light reminder signal is to remind the staff and the customer that the distance between the staff and the customer has exceeded the safety limit (this safety limit can be adjusted according to the safety distance standard established by the Center of Disease Control in each country), and it is a reminder customers should pay attention to maintain a safe distance from the staff.
3. If the distance between the customer and staff is less than 36 inches (this distance is adjustable), there will be audible sound and light flashing to alert the visitor to stop approaching and retreat to safe distance.
4. The alarm can be turned on or off.
5. The safety distance limit of detection is easily adjusted by the adjustment instrument on the device combine with the distance display on the device. Similarly, the distance of the alarm sound can be adjusted.

## SPECIFICATION

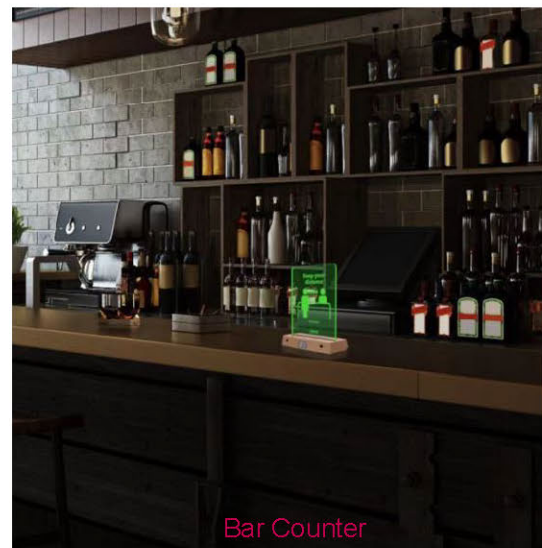

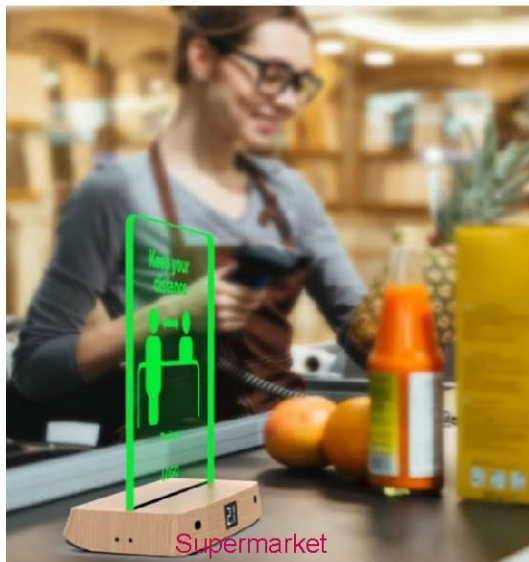

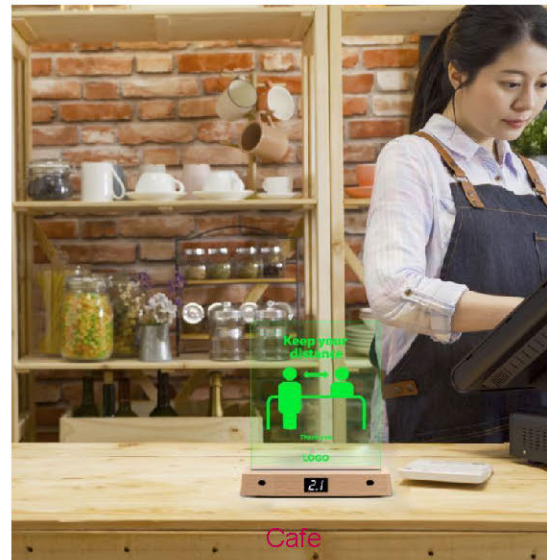

FEATURE	SPECIFICATION
Technology	Double ranging probes design
Product Size	18cm(W) X 25cm(H)
Maximum Detectable Distance	3.5m
Detection Scanning Angle	45°
Detection Display Range	0-3m
Adjustable Range of Safety Limit Value	0.9-2.1m
Adjustable Range of Alarm Limit Value	0.4-1.5m
Power Interface	USB-A(5V/1A) and USB-C(5V/1A)
Alarm	Can Turn on or off

# SMART SOCIAL DISTANCE AWARENESS REMINDER

## APPLICATIONS

**GUESTCONTROL™**  
The Choice Of Excellence

**HARLE HOSPITALITY
