

# **ORIGINAL STROHHALM**

## It is time for straws to be what they were again.

**Our real straws are not just another alternative to plastic drinking straws, they are the original!**

Real straws are grown naturally, namely as a wheat plant. After harvesting the grain, the remaining stems are processed into straws: they are cut, sorted, peeled and gently sterilized with hot water.

**After use, they are 100% compostable as garden waste and are returned to the natural cycle.** New grows from old. Real straws are therefore a purely organic product that does not have to be manufactured artificially.

Real straws do not need a coating or an adhesive, because they are naturally waterproof and do not soften at all. This makes them ideal for cold drinks.

The stalks do not contain gluten!

**Every straw is unique, looks great and tastes natural.** A surprising and extraordinary drinking experience.

*Tested by an independent testing institute.*
