

WATER FILTER KIT

 <p>Post Filter The Post Carbon Inline Filter removes any remaining tastes or odors from the pure water after filtration and storage.</p> <p>RO Membrane The semipermeable Membrane element removes up to 99% of aesthetic and health-related contaminants.</p> <p>Pre Filters Filters water previous to RO Membrane with the (PP) Polypropylene Sediment (GAC) Granular Activated Carbon (CTO) Carbon Block</p>	 <p>Standard 5-stage Filtration (PP+GAC+CTO)</p>	 <p>Reverse Osmosis Filtration (PP + GAC + CTO + RO + PostFilter)</p>
<p>5-Stage Reverse Osmosis Filtration System</p>	<p>Filter Kit 1:</p>	<p>Filter Kit 2:</p>

Recommended filter cartridge replacement:

- Standard filtration kit – every six (6) months
- Reverse Osmosis filtration kit – every six (6) months for PP+GAC+CTO and every twelve (12) months for the RO filter kits

NOTE: This is dependent also on the water quality from the inlet/supply line. Replacement can be done earlier if water quality is bad.
