*Experience the future of eco-friendly
travel with GUESTCONTROL™
state-of-the-art wall-mount charging
station in hotel guestrooms*

*Designed to keep the guests getting more out of their
charging experience*

Wireless chargers have been around for a while, but wall-mount version is rather new and they are fast becoming mandatory in hotel guestrooms due to their convenience and efficiency.

No More Tangled Cords

One of the biggest advantages of a wall-mounted wireless charger is that the guest no longer has to deal with tangled cords. With a wall-mounted charger, the guest can simply place his phone in the charging docket and start charging. No more untangling cords, no more accidental unplugging.

Always Accessible

Another great thing about wall-mounted wireless charger is that it is always accessible. The guest does not have to worry about finding an outlet or cable to charge his device.

Efficient Charging

Wall-mounted wireless charger is designed to deliver efficient charging to the guest's device. The charger provides a consistent stream of power, which can help the guest's phone charge faster than it would with a traditional charger. Additionally, the GUESTCONTROL™ wall-mounted wireless hub is equipped with intelligent charging technology, which will automatically stop charging when the guest device reaches 100% capacity. This helps to protect the phone battery and extend its lifespan.

Aesthetically Pleasing

GUESTCONTROL™ Wall-mounted wireless Hub has various options such as materials and colors which matches the hotel interior decor. They also take up less space than traditional chargers, which can be helpful in the hotel guestroom where space is limited. With wall-mounted wireless chargers, you can charge your phone and still have plenty of room for other items.

Features and Specifications

- Provides convenient wireless charging with a wall-mounted 15W Qi-enabled charger. Also includes built-in USB Type-A and Type-C connection for additional power access.
- Fast Charging for Wireless and on both USB-A and USB-C ports.
- Installs easily as a single-gang outlet. Can be placed together in a multi-gang panel with other switches, sockets or information outlets.
- All GUESTCONTROL™ wireless hubs and USB Outlets are manufactured through high-quality design, production and backed by an Extended Warranty.
- Different color and material options available to fit any interior deco, existing hardware and lighting trends.
- Stylish design with a sleek, screwless wall plate that can coordinate with other designer switches and outlets available from the GUESTCONTROL portfolio Collection.

Advantages of Wireless Charging

As the world moves towards a more tech-savvy lifestyle, one of the major areas of focus is the ability to charge devices wirelessly. With numerous advantages over traditional charging methods using cables and plugs, wireless charging is rapidly becoming the new status quo in charging technology in hospitality industry.

GUESTCONTROL has innovated a series of wall-mount wireless charging hubs that is able to provide wireless charging to hotel guests in their rooms.

The Advantages of Wireless Charging

GUESTCONTROL™ Wireless charging has several advantages over traditional wired charging:

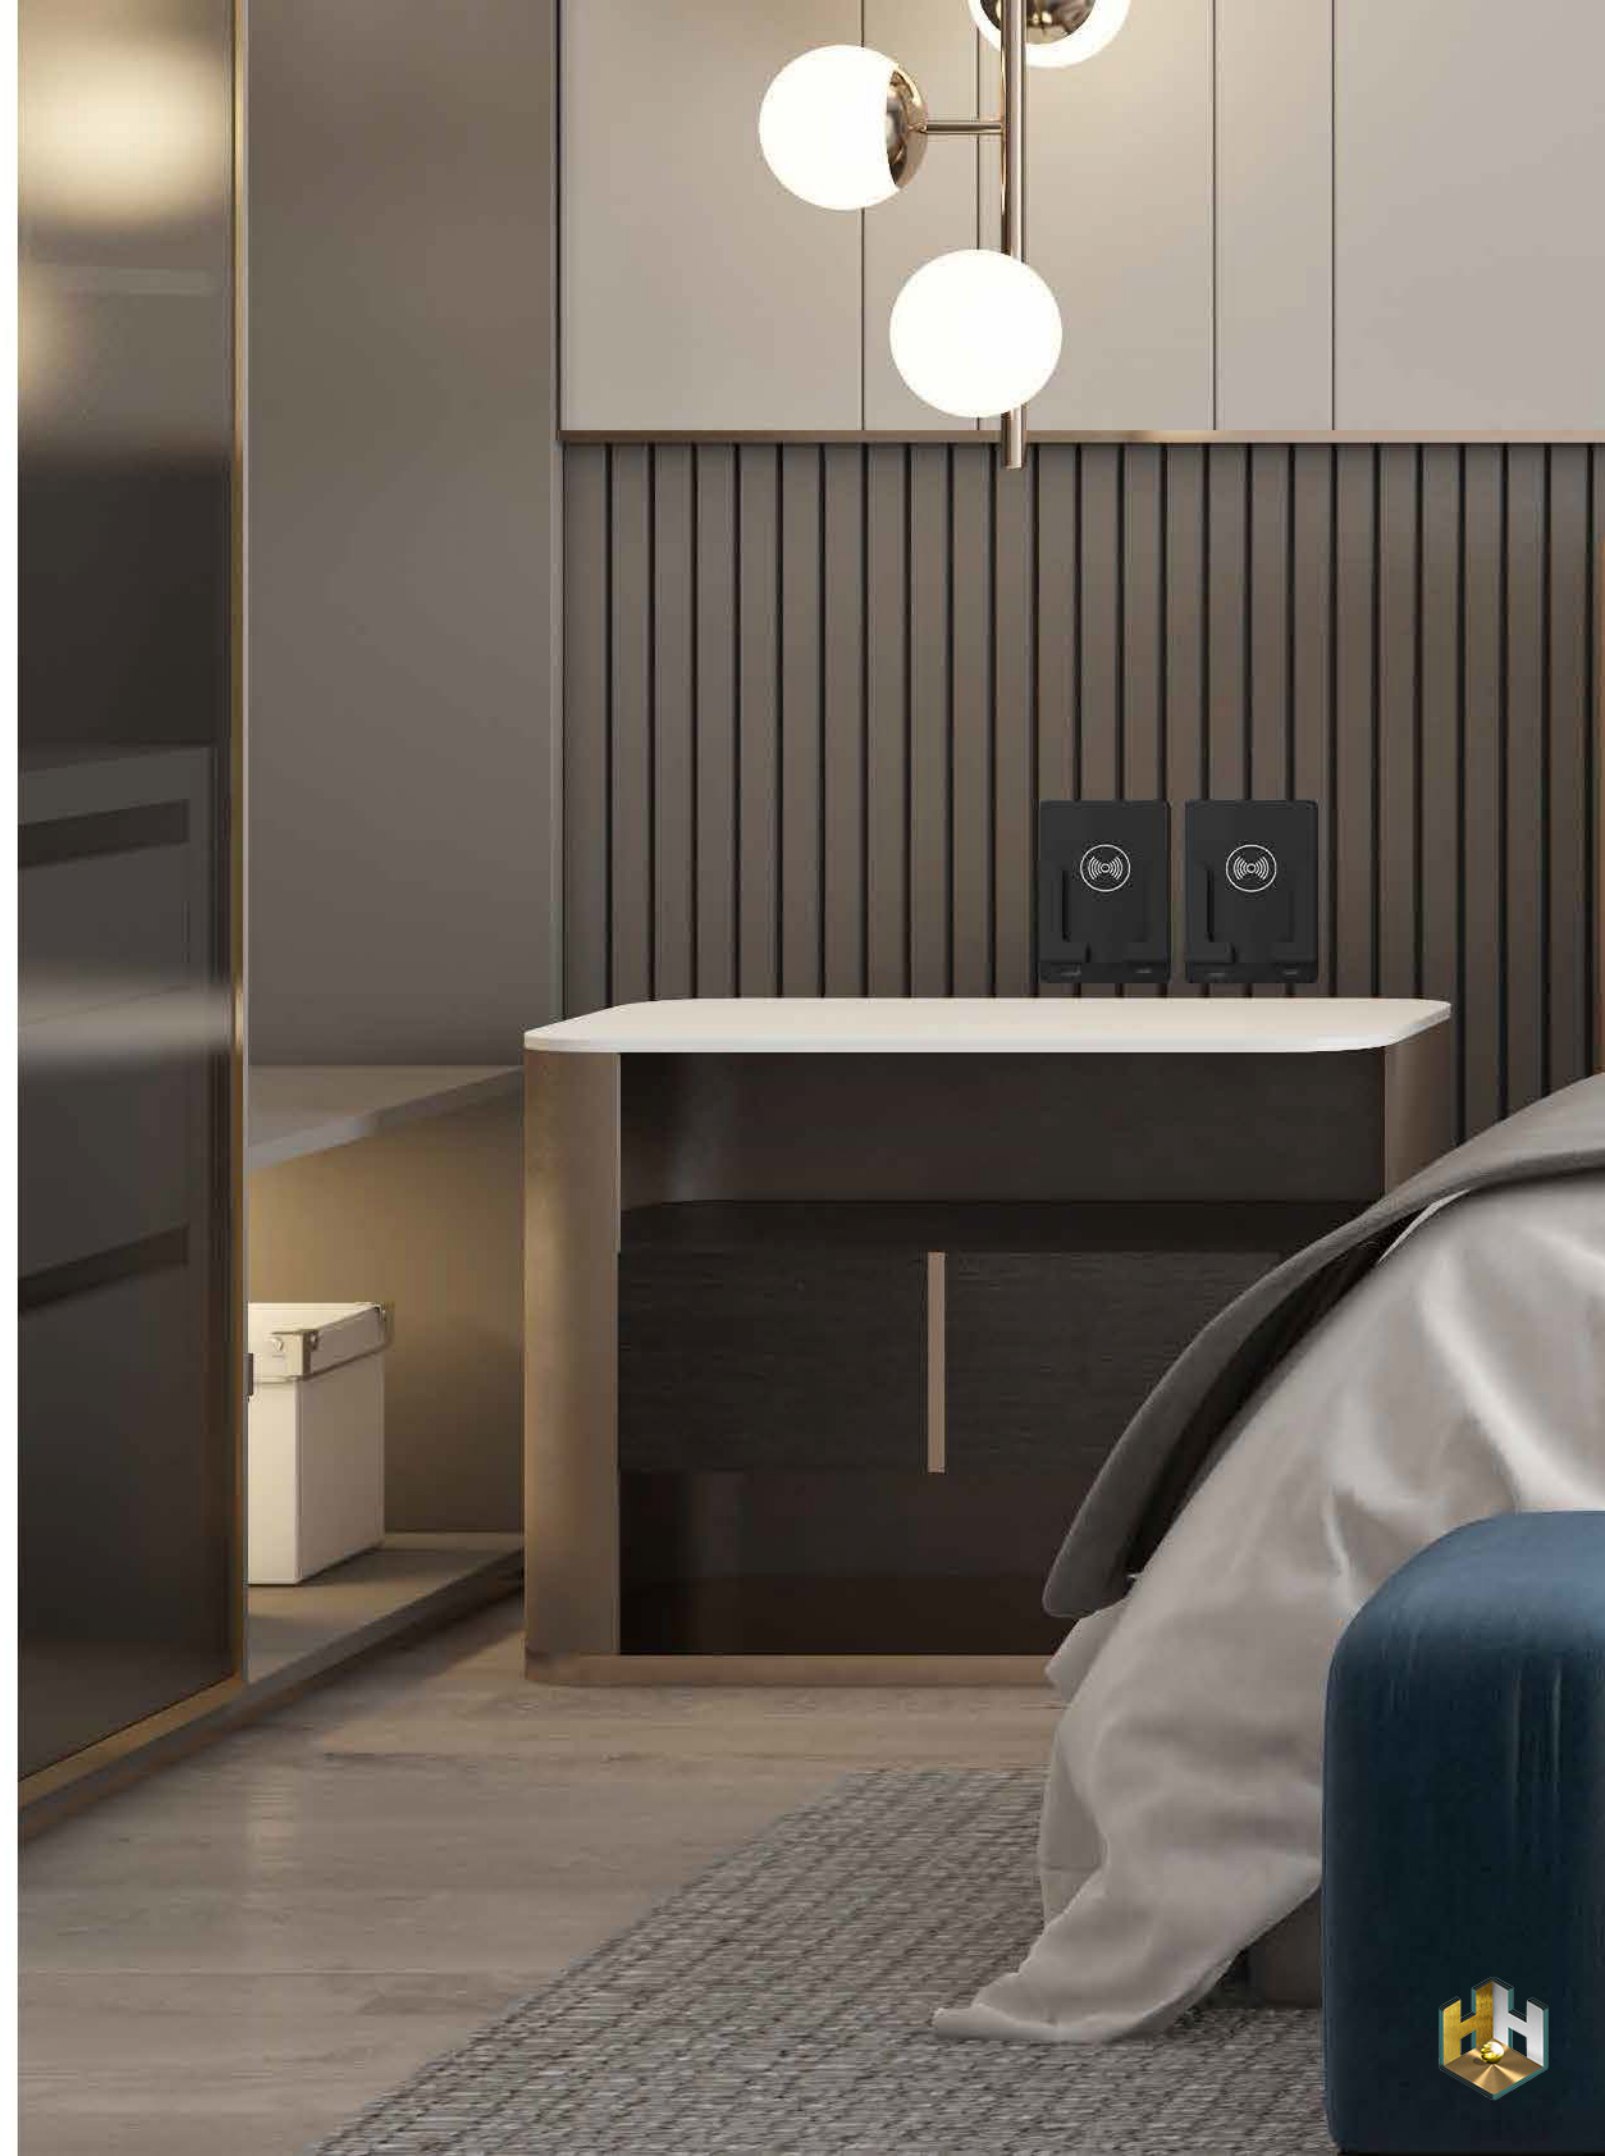

- Convenience – Wireless charging eliminates the need for cables, making it much easier and quicker to charge the guest device. The guest simply place his mobile phone on the charging device and charging will begin automatically.
- Efficiency – Wireless charging technology is becoming more efficient, with faster charging times and higher power transfer capabilities.* Qi compatible: Wireless charging is now a standard feature on many smartphones. A wireless mobile charger can power all Qi-compatible smartphones.
- Less clutter: No need to keep track of multiple cords and cables, which often get lost or broken. A single wireless charger replaces them all, making wireless charging a popular choice in hotel guest rooms.
- Extending battery life: The guest can lay his smartphone on the charger whenever needed to give its battery life a quick boost.

- **Safe connections:** As all charging takes place inside the phone, there's no risk of corroded USB ports, reducing the risk of charging errors or electrical faults. The guest also never need to worry about electrical problems caused by third-party charging cables, which can be less than reliable.
- **No Wear and Tear:** Plugging phones into power cable regularly increases the risk of damaging phone ports, which can lead to costly repairs.
- **No Risk of Overheating:** Once a Qi-compatible phone is fully charged, it turns off the wireless charger, saving energy and preventing the battery from overheating.
- **Durability** – Wireless chargers reduce wear and tear on smartphone port, prolonging the life of the guest's smartphone.
- **Wireless charging also reduces wear and tear on ports and cables,** which can be a significant problem for hoteliers in term of maintenance and recurring cost.
- **Versatility** – Wireless charging is not restricted by plug types, so it can be used anywhere in the world with compatible smartphones.
- **Safety** – Since there are no cables involved, wireless charging eliminates the risk of electrical shocks and fire hazards caused by faulty wires and adapters.
- **Sustainability** – Wireless charging is an eco-friendly alternative to traditional charging methods. It reduces electronic waste and saves energy. As the hoteliers become more focused on sustainability, wireless charging is becoming a must in all hotel guest rooms
- **User Experience** – Wireless charging enables smartphones to be charged more seamlessly, creating a better user experience.

Support Qi Compatible Smartphone Models Include:

- Apple iPhone 8, iPhone 8 Plus, iPhone XR, iPhone XS, iPhone XS Max, iPhone 11, iPhone 11 Pro, iPhone 11 Pro Max, iPhone 12, iPhone 12 Pro, iPhone 12 Pro Max, iPhone 13, iPhone 13 Pro, iPhone 13 Pro Max, iPhone 14, iPhone 14 Pro, iPhone 14 Pro Max, iPhone 15, iPhone 15 Pro, iPhone 15 Pro Max.
- Nokia 6, Nokia 8 Sirocco; Nokia 9 Pure View, Nokia XR20.
- Sony Xperia XZ2, Xperia XZ3, Xperia 1 II.
- Google Pixel 3, Pixel 3 XL, Pixel 4, Pixel 4 XL
- Samsung Galaxy Fold, Galaxy Note 8, Galaxy Note 9, Galaxy Note 10, Galaxy Note 10+ 5G, Galaxy S7, Galaxy S7 Edge, Galaxy S7 Active, Galaxy S8, Galaxy S8 Active, Galaxy S8 Plus, Galaxy S9, Galaxy S9 Plus, Galaxy S10, Galaxy S10e, Galaxy S10 Plus, Galaxy S10 5G, Galaxy S20, Galaxy S20 Plus, Galaxy S20 Ultra 5G, Galaxy Z Flip.
- LG V30, LG V35, LG V40, LG V50.

GUEST CONTROL
The Choice of Excellence

GUEST CONTROL SYSTEMS LIMITED was founded on a vision to innovate unique emerging technology solutions for the vertical industry. GUEST CONTROL SYSTEMS LIMITED brings to its position as an advance solutions design and development company a rich heritage of innovation and technological advancement.

Today, GUEST CONTROL SYSTEMS LIMITED has moved well beyond the role of traditional solution development and has been focusing on creating total vertical industry applications and solutions that can help the vertical industry to reduce their capital expenditure, operation expenditure while improving their revenue. The result is a unique market niche highlighting the company's ability to offer its portfolio of applications and solutions at lower cost, increased reliability with value added advantages.

GUEST CONTROL SYSTEMS LIMITED solutions are at works in thousands of vertical enterprises extended across the globes including those prestigious fortune 500 companies. It is this level of experience and performance that has positioned the company in a place of prominence as it continues to expand its solutions portfolio to meet the challenging vertical industry market needs.

OUR COMMITMENT

GUEST CONTROL SYSTEMS LIMITED is committed to deliver innovative state-of-the-art hospitality Wireless charging technology to the hoteliers all over the world. With the company team expertise and accumulated global experience in wireless charging, we are able to set standard for hospitality wireless charging products and solutions. We create lead in innovation to ensure the hoteliers are at the forefront of technology. We ensure your hotel are at world-class status while we care for your service optimization, process efficiency, deliver outstanding guest experience, guest loyalty and profitability.
