OUR HAIR DRYERS

PAGES 6-12

MAKE YOUR GUESTS FEEL RIGHT AT HOME

Our hair dryers are elegant and easy to handle, designed to offer maximum comfort to your guests: a good grip on a sturdy accessory, packed with technology for gentle yet efficient drying and a design that leaves no one cold.

PAMPER YOUR GUESTS

Appreciated by more than two-thirds of surveyed guests and a compulsory amenity at hotels with four or more stars, hair dryers have gradually become a must in the field of hospitality. A study by the CMHF (Committee for the Modernisation of French Hotels) showed that hair dryers are the most important bathroom accessories, particularly popular amongst female guests. These handy, powerful and stylish devices give travellers all the convenience they expect, without having to lug their own hair dryers along with them.

UNTANGLE TRUTH FROM FICTION

Choosing a hair dryer is a question of more than just power! Some devices are designed to deliver superior drying quality at more moderate temperatures. So, in addition to protecting delicate hair by controlling the use of speed and heat, these appliances use much less energy, costing you less in turn. Plus, some solutions allow guests to adjust the speed and heat of the hair dryer.

INNOVATE WITH OUR IONISING SYSTEM

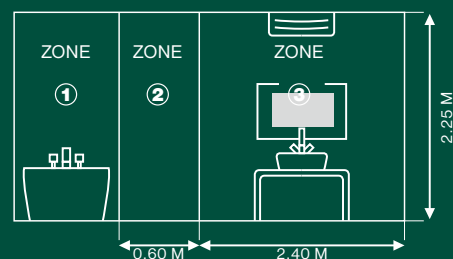

To neutralise the static electricity that can occur in hair during the drying process, some devices are fitted with an ionising system, which dries hair quickly, at a low temperature, without damaging the hair's fibres. The ions generated by this system neutralise static electricity.

PLAN FOR EVERY POSSIBLE USE

Hotel hair dryers are not subject to the same constraints as hair dryers marketed to the general public. Aside from the strict standards they must meet, hotel hair dryers are sometimes used in unexpected, undesirable ways (stolen, used to dry clothes or shoes, etc.). And so, they should be designed to limit those uses (e.g. JVD LighTouch® handle, timer, anti-theft protection, etc.) while still being a perfect fit for any bathroom. They require a dedicated mount, which should feature shaver sockets to meet the needs of an international clientele.

PROTECT EVERYONE'S SAFETY

To prevent any risk of electrocution, standard NF C15-100 defines a minimum distance between your electrical appliances and the main water tap (bathtub or shower). Only hair dryers with hoses can be installed close to this tap (in zone ②). All other devices must be installed no closer than zone ③, or as per each country's respective electrical regulations

OUR MINIBARS

PAGES 34-41

Our minibars are fitted with next gen smart technologies. Whether you choose our thermo-absorption or the compressor systems, our minibars are eco-friendly, reliable and silent.

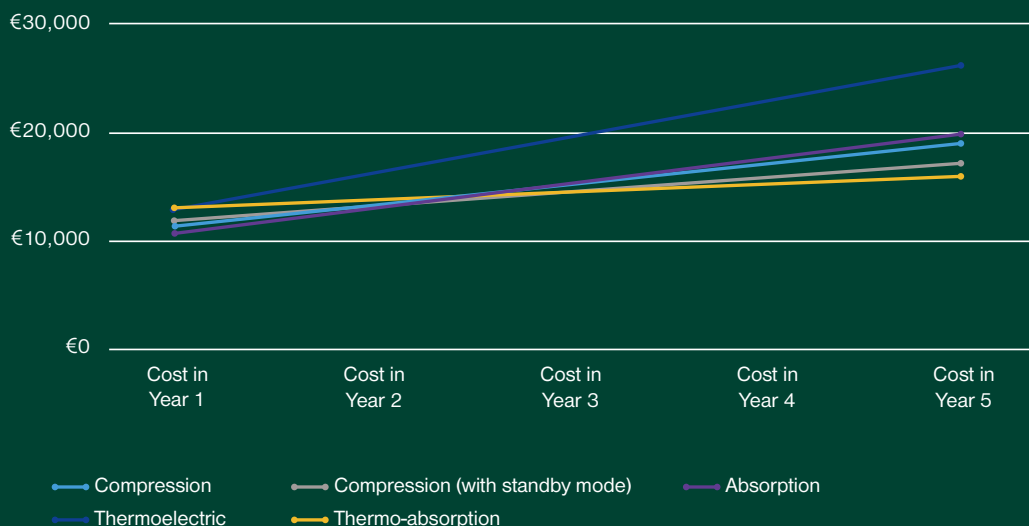

THERMO-ABSORPTION MINIBARS FOR MAXIMUM SAVINGS

Next generation thermo-absorption minibars blend the Peltier effect with absorption to generate cold. They are ecological, reliable and completely silent, consuming 66% less energy.

ABSORPTION MINIBARS FOR MAXIMUM AFFORDABILITY

Compression minibars use a refrigerant to cause cooling by compression. They are effective and offer maximum coldness.

OUR MIRRORS

PAGES 57-63

CHOOSE YOUR MIRRORS WITH CARE

Our mirrors are the result of a special alchemy melding innovation, performance and design. They invite guests to enjoy a unique experience with complete simplicity.

OPT FOR SIMPLICITY WITH NO ELECTRICAL CONNECTIONS

Our Cosmos, Galaxy and Eclips mirrors run on a lithium battery and a three minute auto-off system ensuring longevity of three to five years. These mirrors can safely be installed in any part of a bathroom, since they do not plug in.

SUPPORT FRENCH DESIGNS AND MANUFACTURING

Devised by our Design Department specifically for use in hotel bathrooms, our illuminated mirrors are made in Nantes, France.

PIVOT TOWARDS TILTABLE MODELS

Thanks to their double or triple rotational axis, our mirrors offer your guests the best possible reflection.

ADOPT AN ECO-FRIENDLY STYLE

Our illuminated mirrors are fitted with LED lighting to maximise their lifespan without having to change the bulbs and to reduce their energy consumption.
